

## Uploading Updates and Community Connections

Please thank local web designer, Rowan Cockett, for volunteering to create a dynamic webpage on [www.natureground.org](http://www.natureground.org) which can house all the Brentwood Bugles ever published – provided some volunteers are willing to help by scanning back issues!

Under the Community tab at the top right of the home page, select the Bugle link to get to [www.natureground.org/bugle.php](http://www.natureground.org/bugle.php). There will also eventually be a “Community Newsletter” option on the sidebar that will take you to the same page. From there it will be easy to see what issues need to be scanned and uploaded – LOTS! If you don’t see it there, we do not yet have it digitally.

Contact the Community Association for back issues, or comb through your attic or basement nooks. You can email full resolution, colour pdf files to us as below, and we will upload them to the page in semi-reverse chronological order – done automatically by Rowan’s program! They will be in time sequence within each year’s grouping, but then working backwards down the page by year starting from the present at the top.

Interested parties and those researching in advance of the upcoming semicentennial celebrations for the Calgary Public Library, including our Nose Hill branch, in 2012, and the Brentwood Community Association’s in 2013, can then read or download from there. Help build these archives and watch them grow!

For another website Rowan has recently designed for his software program to assist geoscience students in visualizing 3D constructs, see [visiblegeology.com](http://visiblegeology.com). It’s pretty cool. He’s even in the process of creating a web page for Serena’s Beauty Centre, a local business right near the first Brentwood community mural which

Rowan and so many other local youth helped to paint in the summer of 2004. Thank you to Filomena Gomes for linking up a business with local talent while she was utilizing local services. Word of mouth and face-to-face conversation: what a truly great way to build community connections!

The vernal equinox next comes our way on Sunday, March 20, 2011 at 17:21 MDT. Why not head out around the community looking for new ways to build more connections.

Environmentally yours,  
Polly Lee Knowlton Cockett
